

Download Agfa Digital Camera Manual

In 1968 Agfa introduced its red sensor point, a round membrane made of red foil and framed with a metal ring. Depending on the camera type, either a mechanical or an electromechanical shutter release button was hidden under the flexible membrane. The resultant company produced models from both the Ansco and Agfa lines. In 1939, the Agfa-Ansco name was changed to GAF (General Aniline & Film), and the company continued to produce both AGFA and Ansco cameras.
